All National Covid-19 Testing Laboratories,
Juba and all borders,
RSS-Juba

RE: Notification of Introduction of E-Governance to all Covid-19 Testing Labs and centralization of Covid-19 Data through one unified COVID-19 result certificate.

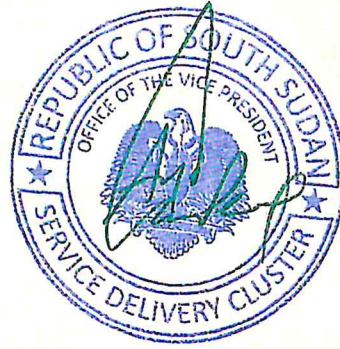

The National Taskforce on Coronavirus Pandemic hereby notifies all the Operating and authorized Covid-19 laboratories that there is a newly introduced E-governance management system. This system is designed to centralize all the results and functions of the Covid-19 laboratories in South Sudan as policy set out by the Government of South Sudan.

All labs are therefore urged to have a sit down with the National Telecommunication Agency to explain the system in depths including how data can be acquired via health.eservices.gov.ss. The Covid-19 lab technicians are invited to interact with National Communication Agency (N.C.A) e-governance and contribute on effectiveness of the system being introduced.

In regards to all these, the National Taskforce looks forward to your cooperation so as to allow data accessibility in real time by the Ministry of Health and National Taskforce.

Best Regards,

Mr. Ayaga Garang Deng
Executive Director,
Office of the Vice President Service Delivery Cluster,
Chairman of the National Taskforce on Coronavirus Pandemic.
