Dr Pius Ojara

Chairperson

South Sudan NGO Forum

Juba

Subject: Requesting Full Registration of Doctors, Dentist, Pharmacist and Other Professionals.

South Sudan General Medical Council (SSGMC) is a constitutionally mandated body set up to regulate health institutions; medical; dental and Pharmaceutical professions with the overriding aim to protect the public as well as professional guidance to doctors and other health professionals.

Therefore one of the first fundamental procedures - among other things- is to validate the credentials of the practitioner and then fully register them in the register of the competent, and maintenance thereafter.

And as we are about to finalize and make public the register of the competent practitioner, we do kindly request from all NGOs working in the health Sector to avail the list of the above mentioned professionals employed by you to the Medical Council as soon as possible for full registration. You are also reminded that all medical, Dental, Pharmacy and other health practices must obtain an accreditation license from the medical council.

Best Regards

Dr. Santino Tipo Tito

Registrar (SSGMC)
