### Service Monitoring and Coordination

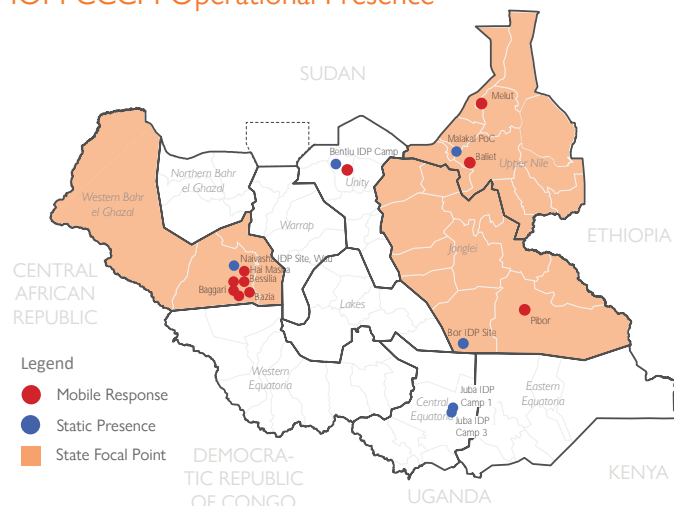

In line to CCCM's mandate to ensure that displaced population have equitable access to basic services, assistance and protection, IOM CCCM carried out a service monitoring in Bentiu, Naivasha and Malakal between April and May. This has contributed to CCCM Cluster's advocacy document to establish the serious gaps in the displacement sites as a result to many agencies' funding shortfall which presented the deterioration of the camp situation because of significant service reduction especially with WASH, Health, Education and FSL. Service Monitoring and coordination aims to uphold standards and hold agencies accountable for provision of adequate services and assistance to the displaced population. Camp Management team will continue to coordinate the needs of the IDPs to the partners in the field.

leaders. The training that was attended by 14 individuals including 6 from RRC and 8 from CHC aimed at introducing RRC members and community leaders to their roles and responsibilities, strengthen communication and trust building between new CA and community leaders and enhance their capacities in CCCM core functions including Coordination, Governance and information sharing. The training also incorporated training on cross cutting issues including mainstreaming protection, AAP and GBV.

### IOM CCCM supporting capacity building of new Camp Administration in the Bentiu IDP Site

Following the reclassification and transition of Bentiu PoC site to formal IDP camp under the administration of the South Sudan Government on March 16, 2021, Camp Management jointly with the Protection, Transition and Reintegration (PTR) unit of UNMISS and Protection partner facilitated a CCCM capacity building training to the new Camp Administrative represented by the South Sudan Relief and Rehabilitation Commission (RRC) - an operational arm of the Ministry of Humanitarian Affairs and Disaster Management – and Community High Committee (CHC)

### IOM CCCM Operational Presence

## CCCM team in Wau supporting capacity building of women through the Women Participation Project, Western Bahr el Ghazal State

Following the successful selection of 40 women including 10 with disabilities - 25 from Naivasha and 15 from Masna IDP site – as project participants for phase 6 of the IOM Geneva-USAID “Safe from the Start” partnership Women Participation Project in Q1 of 2021. During the second quarter, IOM CCCM team boosted the capacity building component of the project. A series of Women’s leadership trainings were conducted for all participants across the two project sites in April and May. The women were trained in groups to respect C-19 precautionary measures. The two-day training supported by IOM Protection aimed to empower participants by enhancing their leadership skills and awareness of key issues related to gender equality. Business skills trainings were also conducted for all participants across the two project sites. The four-day training, supported by a locally hired trainer with expertise in business, aimed to enhance participants’ knowledge of business practices and provide them with tangible skills to support their small-scale livelihood activities. In Masna following the procurement of sewing and embroidery materials, CCCM team facilitated tailoring skills training targeting 15 women from the site. The trainers were located from the Naivasha participants to promote a mentorship model and peer learning.

## CCCM supporting voluntary IDP return movement from Melut to Baliet, Upper Nile State

In a joint effort spearheaded by OCHA and Upper Nile Relief and Rehabilitation Commission (RRC) representing the Upper Nile State Task Force Team on Solution, IOM CCCM facilitated the voluntary and safe return of more than 6,200 individuals from Melut to their areas of origin in Baliet. The movement was informed by an inter-agency needs and perception assessment in Melut to assess humanitarian situation and ascertain for protection concerns of IDPs willing to return to areas of origins and an inter-cluster assessment in Baliet to identify availability of basic services and general security situation in the three areas of Baliet County Adong, Rianguom and Baliet. Throughout the movement, IOM CCCM team supported with coordination, communication and information sharing through mobile teams stationed at points of departure and arrivals to sensitize IDP-returnees on available services and guide them through the process. The teams also supported with mobilization and liaison with local authorities to ensure IDPs have access to HLP and are aware of existing referral mechanisms. In line with the national guidelines on returnees the Upper Nile Inter Cluster Coordination Group (ICCG) conducted a post returnee monitoring mission to Baliet on June 15. The mission that was joined by the Protection and CCCM Clusters represented by the Upper Nile State Focal Point was with the aim to identify gaps in service delivery in areas of returns in Baliet, engage with returnees and host community governance structures on needs and gaps, identify care and maintenance works needed, and available AAP mechanisms in the community

## CCCM surge team responding to the urgent needs of displaced population in Pibor, Jonglei State

In May, an escalation in inter-communal conflict led to the displacement of thousands of individuals in the Greater Pibor Administrative Area (GPAA, former Pibor County). In response to an urgent request from OCHA, IOM deployed a joint mission to respond to emerging humanitarian needs in the area. During the mission, CCCM team conducted needs assessment in collective centers hosting IDPs and participated in inter-agency rapid needs assessments (IRNA) in Gumuruk and Lekuangle towns which were heavily affected by the violence. Also, CCCM teams coordinated with OCHA, RRC and the Chief Administrator to scale up core activities including coordination and service monitoring, support to self-governance, site care and maintenance, and the establishment of complaint and feedback mechanism in Pibor collective sites. On June 8, CCCM mobile response team concluded their rapid response mission to Pibor following significant return movement of IDPs from Pibor to their areas of origin. CCCM initiated scale-down and phase out activities in advance of departure. In communication with RRC, CCCM hired a casual labour force to clean the schools vacated by IDPs in order to ensure that educational activities for local children could resume unimpeded. Camp management engaged community leaders and local authorities on the humanitarian needs of the remaining IDP households who have integrated within the host community.

## IOM CCCM concluding mobile responses in Wau County, Western Bahr eh Ghazal State supported by the South Sudan Humanitarian Fund (SSHF) 2020 1st standard allocation ported by the South Sudan Humanitarian Fund (SSHF) 2020 1st standard allocation

On June 3, joint IOM CCCM, S/NFI and OXFAM Protection teams concluded multisectoral mobile responses in Greater Baggari, Bessilia and Bazia Payams of Wau County that were supported by the contribution from the South Sudan Humanitarian Fund (SSHF). Through this project joint teams were able to conduct series of multisectoral needs assessment and subsequent response missions to remote, new and underserved displacement sites within three payams in Wau County. Core project deliverables were establishing coordination and service monitoring mechanism, supporting self-governance, and setting up accountability mechanism across the six project sites. As part of the capacity building support to site self-management committees, through a technical capacity CCCM team constructed a community center in each of Gedi, Ngoku and Mboro sites. These centers will provide an avenue for site level coordination meeting and community engagement activities and will serve as hub for further response and development interventions in the sites.

### CCCM Cluster

In Q2, the CCCM Cluster supported its 7 partners to implement the CCCM activities and about 490,000 IDPs have been reached by CCCM cluster partners with CCCM responses. In addition, the CCCM cluster involved in the first round of allocations under the Country Pool Fund South Sudan Humanitarian Fund (SSHF) which was launched in May 2021, with \$50 million funding divided into 3 different envelopes. During this process, the cluster strongly advocated to address the key service gaps identified by camp management agencies inside the PoC/ IDP camps. The CCCM cluster partners will receive 2.5 million USD under envelope 1 and 2, to carry out the static and mobile CCCM activities, while additional 16.5 million have been allocated to multiple clusters to address the key service gaps in PoC/IDP camps.

In Q2, the CCCM Cluster has developed a guidance note to support camp management partners to strengthen their response during return, resettlement, and reintegration of internally displaced persons in South Sudan. This guidance note on camp management activities during return, intends to provide recommendations to camp management agencies in South Sudan on identifying and designing activities and programmes for delivering integrated camp management responses. Additionally, in accordance with the CCCM

Cluster agenda supporting capacity building of CCCM partners including national NGO to enhance humanitarian response, CCCM Cluster facilitated 2-days CCCM capacity building training for humanitarian partners including local NGOs. The training was attended by 38 individuals from 17 International and National NGOs with 30 of the participants being men and 8 Women. The training aimed at increasing participants' understanding of the CCCM sector, train CCCM actors on their roles and responsibilities and CCCM core functions including Partner Coordination, Governance and Participation, Information Sharing and Communication with Communities. The training also incorporated trainings on streamlining protection in the CCCM response.

### Site development works in preparation of the rainy season

Care and Maintenance teams in Bentiu and Malakal are scaling up the mitigation works to ensure safe access and environment is maintained during the rainy season which peaks from June to September. The team prioritized the improvement of camp infrastructures such as drainages and culverts to reduce flood risks. As of the reporting period, a total of 16,911 meters of drainages were rehabilitated, developed, cleaned and reinforced including the primary and secondary trenches, 261 culverts were desilted, cleaned and reinstalled, and 4,751 meters of roads were rehabilitated, leveled and compacted.
